Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the closest prior art of record (Liao et al, U.S. Patent No. 6,480,957 B1) does not teach nor suggest in detail a wireless data transmitting and receiving system having server device connected wirelessly to a plurality of client devices constituting a wireless network transmitting and receiving data packets on a time division basis between said server device and said plurality of client devices over said wireless network, wherein said server device further comprises:

“schedule inputting means for inputting a schedule list regarding reproduction-destined data to be input in future based on said control data from said client devices; preset table creating means for creating a preset table for presetting the reproduction-destined data to be input in future based on the input schedule list and on said control data from said client devices; and time counting means for counting time,

wherein said second controlling means of said server device *causes the preset reproduction-destined data to be input selectively through said inputting means based on said preset table and on the time counted by said time counting means.*”

in combination with all the elements of each independent claim as argued by Applicant (see page 20 of applicant's argument dated 01/23/2006 as well as the enabling portions of Applicant's specification, pages 32-45; fig. 10). So as indicated by the above statements, Applicant's arguments have been considered persuasive, in light of the

claim limitations, the enabling portions of the specification, as well as the preferred embodiment of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
